

**THIS IS
CHEMICAL
ABORTION**

WARNING

**YOU NOW
WORK FOR AN
ABORTION VENDOR.**

Chemical Abortion Pills aka RU-486 are now being dispensed from pharmacies across the nation, including yours. Here are the risks to women that you are cooperating in.

ThisisChemicalAbortion.com

RISKS TO WOMEN

- Pain, possibly severe
- Heavy and/or prolonged bleeding for multiple weeks
- Fever
- Incomplete abortion (requiring surgical follow-up)
- Nausea & vomiting
- Diarrhea
- Feeling dizzy or having a headache

- Short-lasting hot flashes
 - Hemorrhage
 - Blood clots
 - Undetected ectopic pregnancy, which is life threatening
 - Maternal death
 - Permanent infertility
- *If an Rh-negative mother is not administered RhoGAM as is done with dangerous “no-test” abortions and telemedicine chemical abortion

RISKS TO THE BABY

- Starvation
- Death

HUMAN BEING AT 11 WEEKS GESTATION

- These dangerous drugs are given to women up to 11 weeks pregnant. By 11 weeks, a unique human being is developing.

AT 11 WEEKS, A PREBORN BABY HAS DEVELOPED:

- Heartbeat
- Brain waves
- Fingers and toes
- Organs, muscles & bones
